

# Android studio methods separator

[Ask Question](#)

10

How to add line separator after every method.

like this:

1

```
@Override
protected void onStart() { super.onStart(); }

@Override
protected void onStart() { super.onStart(); }

@Override
protected void onPause() { super.onPause(); }

@Override
protected void onStart() { super.onStart(); }

@Override
public boolean onCreateOptionsMenu() { return super.onCreateOptionsMenu(); }
```

Simply enable in settings

**Appearance:** **Show** methc

Or hit Shift 2 times in Editor Area and type method separators
