**This question already has an answer here:**

How to increase the font size in Android Studio?   *17 answers*

This may seem like a silly question but does anyone know how to zoom in/out of the editor window in android studio? I have actually researched it before people give me minus marks. Ctrl+ and Ctrl- seem to fold and unfold methods, there is no zoom control in the view drop-down and all the googleing ive done has referred my to zoom the control feature of a WebView. Am i missing something?

In Preferences > Editor, there's an option "Change font size (Zoom) with Command+Mouse Wheel". (I'm on MacOS; on other platforms it might be control+mouse wheel).

You can also go into Preferences > Keymap > Editor Actions > Decrease Font Size/Increase Font Size/Reset Font Size and bind some keys to those commands.

IntelliJ and Android Studio have decent built-in search for finding application functions. In the preferences dialog, you can just start typing to do search (you can just start typing from a lot of places in the UI to begin a search); there's also a search box.

There's a key binding for searching actions by name; on MacOS it's command-shift-A. That's a super-handy feature.

14    +1 `There's a key binding for searching actions by name; on MacOS it's command-shift-A. That's a super-handy feature.` on windows it's `ctrl+shift+a` — [Shishir Gupta](#) Nov 11 '14 at 8:30

1    How to get it back to the default size? — [Ethan_AI](#) Feb 9 '16 at 22:33

On MacOS there is a slight bug where if you have this option enabled, if you press command after a trackpad scroll, it will change the font size until the scroll settles. It is annoying and I have it disabled for this reason. — [Andrei Lupsa](#) Feb 21 '16 at 15:03

Modify the settings of the android studio as shown below

Step 1: Open **Android Studio** and Go to **File**

Step 2: Open **Settings**

Step 3: Click on **Editor**

Step 4: Click **General**

Step 5: Check **Change font size (Zoom) with Ctrl+Mouse Wheel** (as shown in below snapshot)

2.0 the font changed and became bigger.

the provided solutions allow a change of font size just for the current page (opened page) if you want to change your entire font size of android studio you have to do this :

go to **Settings**>**Editor**>**Colors&Fonts**>**Font**

then click on **"save as"** and create a new profile name it "my profile" for example

and finally you can put the font of that profile, i put 12 so it was the previous version

On a 2016 Macbook air without an external mouse, do the accepted answer, and pinch on the trackpad to shrink the text, reverse pinch to enlarge.

## To change font size:

```
Select **Android Studio** menu (which is present next to A|
>Editor-->Font-->Size(give size)-->ok
```

## To zoom in and out in Editor:

```
Select **Android Studio** menu -->Editor-->General-->change
command and mouse wheel-->ok
```
